**DIVERSIFIED FACILITY OBTAINS APPROVAL FROM NATIONAL ARCHIVES & RECORDS ADMINISTRATION**

SCRANTON, Pa.–March 17, 2009–Diversified Information Technologies, a leading provider of automated information-management solutions, headquartered in Scranton, Pa., with 18 U.S. and three international locations, announced today through its President and CEO, Scott Byers, that its location in Delano, Pa., has been approved for use as a federal records storage facility. “Our Delano facility is the second Diversified facility to be accorded this designation by NARA, the National Archives and Records Administration, and demonstrates our commitment to securing compliance and protecting the information of our federal government and commercial clients,” Byers said.

According to Leo Malsky, Vice President of Operations, “Diversified was the first commercial vendor listed on the NARA website as having an approved facility for the storage of federal records in compliance with the requirements of 36 CFR 1228 Subpart K.”

Diversified’s Moosic, Pa., location claims the distinction of being the first commercial vendor facility to be awarded this designation by NARA. Diversified is one of a few companies in the information management industry whose facilities meet the Highly Protected Risk rated standard. “In anticipation of the growing need and demand emerging from our clients, especially in the government sector, to securely manage and preserve their information, we are in the process of obtaining NARA approval for another one of our facilities,” Malsky concluded.
