WILDFIRE UPDATE FOR OUR CALIFORNIA CUSTOMERS

SCRANTON, Pa.–October 25, 2007– The nearest fire to our Camarillo facility was 20 miles away. As of the evening of October 24th, that fire was under control and any smaller fires that had resulted from that fire were completely extinguished.

Our staff has proactively engaged Emergency Management personnel today and verified that the weather conditions have improved with no imminent danger, at this time, to the Camarillo facility.

Current weather conditions at the Camarillo airport are showing 0 winds and clear- to partly-cloudy skies with no restrictions on flight conditions which would have resulted from smoke and fire embers being carried by the winds of the past few days.

We will continue to monitor the situation and pro-actively address the situation. If you have any concerns please contact us immediately and check our web site diversifiedweb.com for updates.

About Diversified Information Technologies

Headquartered in Scranton, Pennsylvania and founded in 1982, Diversified Information Technologies helps clients transfer paper-based file management systems to a secure, electronic environment, allowing its customers to access and share files, invoices and other documents. In addition, Diversified provides availability solutions, electronic mailroom processing, automated forms and healthcare claims processing, and archival records storage. For more information, visit www.diversifiedweb.com.
