DIVERSIFIED NAMED INNOVATION AWARD WINNER

SCRANTON, Pa.–23 April, 2009–Diversified Information Technologies, a leading provider of automated information-management solutions, headquartered in Scranton, Pa., with 18 U.S. and three international locations, announced today through its president and CEO, Scott Byers, that Diversified has been named a Innovation Award winner by the Ben Franklin Technology Partners. “I am proud to accept this award on behalf of the Diversified team and appreciate the recognition from Ben Franklin Technology Partners,” Byers said. The award is bestowed on the company that best demonstrates a “break the mold” approach to integrating new or existing technology into a manufacturing environment. Diversified will receive the honor at the iXchange event on Tuesday, May 12, 2009, 5:30 pm, at Lehigh University’s Zoellner Arts Center.

Diversified began 26 years ago as a records storage company. The business plan called for the company to provide a lower-cost alternative to companies in New York City. Today, Diversified’s core competencies in data capture, processing, and document preservation result in reduced cost, shorter cycle time, and risk mitigation for clients’ critical information-management needs.

Clifford K. “Cliff” Melberger, founder and co-chairman of the board, reflects “Technology has accelerated the pace at which Diversified has been able to evolve from where we were 26 years ago to where we are today. And technology continues to increase the pace of evolution. What differentiates us from the competition is that from day one, we have never abandoned our value of putting the “Client First” and innovating for purposes that are always client-centered. All things being equal, the client-first approach always wins!” he concluded.

Questions can be directed to Josephine Panganiban at the email address listed above.

About Diversified Information Technologies

Headquartered in Scranton, Pennsylvania and founded in 1982, Diversified Information Technologies provides automated information-management solutions that perfect business processes and secure compliance for clients’ information management needs. Diversified captures, processes and preserves data using its portfolio of tools: information management consulting/workflow analysis, electronic mailroom processing, document imaging/data capture, online secure data access, and records storage/scan-on-demand.
