**DIVERSIFIED ANNOUNCES NEW SOURCECOPY<sup>SM</sup> PARTNER**

SCRANTON, Pa.–October 30, 2008–Diversified Availability Solutions (DAS), an industry leading online data backup service provider, and Apex IT Group, an expert in managed and professional IT services for corporations, today announced a joint offering that will provide one of the industry’s most powerful solutions for multi-site backup and recovery to IT professionals, the insurance industry and all companies concerned with records compliance.

SourceCopy is a managed, online data-vaulting service ideal for organizations concerned with data loss and meeting regulation requirements. It allows clients to quickly restore lost files, documents, and critical data, protecting them from potential business disruption and long-term damage. Equally important, SourceCopy simplifies and streamlines the backup/ restore process to save time and money, compared to antiquated tape technologies.

“Apex is excited to bring this new solution to our clients and the market”, said George Mach, CEO of Apex IT Group. “Our extensive research shows that SourceCopy is the most robust and secure solution on the market for data backup and recovery, which is in high demand by our clients. SourceCopy is a complimentary service to our current managed IT services.”
